

BUSINESS STUDIES

HOW WILL I BENEFIT FROM STUDYING BUSINESS?

Business Studies provides you with real-world experiences. This course prepares you with information and skills that are applicable both personally and in any career choice. The topics of consumer choice, financial literacy, and personal finance help you learn to manage your finances in our increasingly complex consumer-driven world. In this course, you will unleash your entrepreneurial capabilities by developing new business ideas for the \$20 Boss Program.

You will learn about economics and the circular flow of our economy. In later grades, you will learn basic and essential accounting skills using both manual and computerised systems, such as MYOB. As every business person needs good communication skills, report writing, and presentation skills these topics will also be covered in Business Studies.

WHAT ARE THE TOPICS IN YEAR 8?

Semester 1: Introduction to Economics

Semester 2: \$20 Boss Program (entrepreneurial program)

WHAT IS THE ASSESSMENT?

Students will be assessed under the Australian Curriculum. A variety of assessment techniques are used in Year 8 including a test, an assignment, and a project.
