

LITERACY & NUMERACY ENHANCEMENT (LANE)

HOW WILL I BENEFIT FROM LITERACY AND NUMERACY ENHANCEMENT (LANE)?

The LANE program is designed to support students in the development of their literacy or numeracy skills across the curriculum.

Students who select the LANE program will be reviewed and a decision will be made based on the following: feedback from teachers, parents, and applicable staff, NAPLAN and PAT testing, as well as academic achievement and subject data. Class numbers are kept low in order to be of most benefit for students.

WHAT ARE THE TOPICS IN YEAR 9 & 10?

The LANE program is run in addition to timetabled Mathematics and English classes. Students will study topics which are similar to their classroom Mathematics and English topics. LANE as additional lessons mean that more time can be spent with each student to review and rephrase learning and understanding of the core content.

Our Senior Pathways program in Year 10 helps to prepare students for Years 11 and 12. During the program, which runs in lieu of LANE, students learn time management and organisational skills that help to establish routines and habits for senior. Students also find this a valuable time to work on their current subject load with our Enrichment Centre team, including study skills and assessment preparation.

WHAT IS THE ASSESSMENT?

There is no homework or assessments set for LANE. At the end of the semester, progress will be reviewed and students will receive a comment from their LANE Teacher.
